

# **Job Placement Services for Consumers and Employers**

## **Consumer Services**

Consumers are provided employability skills training; job development and placement services, including assistance with resume writing and mock interviews. Many offices have Resource Labs equipped with job search technology and with access to the Employ Kentucky Operating System (EKOS).

## **Employer Partnerships**

Job Placement not only serves the consumer but also the employer. Employers are offered assistance in their efforts to hire and retain a skilled workforce. This includes access to a qualified applicant pool and financial incentives such as on-the-job training and tax credits.

The Job Placement Specialist's utilize a marketing approach to form partnerships in the business community. These partnerships increase the quantity and quality of placements. OVR Job Placement Specialists strive to determine the needs of employers and how we can best assist them in meeting those needs. Our untapped pool of qualified workers with disabilities represents a valuable resource to employers who are seeking qualified candidates. Our goal is to develop long-term employer relationships and improve employer satisfaction, resulting in increased employment opportunities for people with disabilities.
